The alumni questionnaire aimed to gather alumni perspectives on various aspects related to their association with GSC. Alumni were asked about their pride in being associated with the college, the level of involvement of alumni in college activities, the impact of their teachers on their lives, the quality of education received, the effectiveness of career guidance and counselling, willingness to contribute to the college's development, cooperation received from teachers for academic support and overall development, the quality of student-teacher relationships, appreciation for recent developments in the college, and whether they have recommended GSC to others.

Alumni were presented with a 5-point scale ranging from "strongly agree" to "strongly disagree."

Approximately 80 alumni participated in providing feedback. As shown in the table below, the "agree" category received the highest percentage of responses for all questions, while the "strongly disagree" category had the lowest percentage.
